Mr. H. K. Wesley
6514 Estele Avenue
Louisville, 14, Kentucky

Dear Mr. Wesley:

The Piper Model PA-17 airplane described in F.A.A. Specification No. A-805 was a development of the Model PA-15 described in F. A. A. Spec. A-800 and is similar structurally and aerodynamically.

By changing the landing gear, listed as Item 211 in Aircraft Spec. A-800, the maximum weight can be increased to 1150 lbs. This will, of course, have to be coordinated with your local F.A.A.

Very truly yours,

PIPER AIRCRAFT CORPORATION

Robert Gift
Field Service Engineer
