April 30, 2013

TYPE CERTIFICATE DATA SHEET NO. E-274

Engines of models described herein conforming with this data sheet, (which is part of type certificate No. 274) and other approved data on file with the Federal Aviation Administration, meet the minimum standards for use in certificated aircraft in accordance with pertinent aircraft data sheets and applicable portions of the Civil Air Regulations/Federal Aviation Regulations provided they are installed, operated, and maintained as prescribed by the approved manufacturer's manuals and other approved instructions.

Type Certificate Holder	Lycoming Engines An Operating Division of AVCO Corporation Williamsport, Pennsylvania 17701
Type Certificate Holder Record	Textron Lycoming/Subsidiary of Textron, Inc. transferred TC E-274 to Lycoming Engines, An Operating Division of AVCO Corporation on December 17, 2003

	O-320-B2E	January 30, 2003	July 8, 2003
Production basis	Production Certificate No. 3		

NOTE 1. Maximum permissible temperatures are as follows:

Cylinder head	500°F (well-type thermocouple)
Cylinder barrel	325°F
Oil inlet	245°F

NOTE 2. Fuel pressure limits: Minimum 0.5 p.s.i. - Maximum 8 p.s.i. For gravity feed systems, minimum fuel pressure is 15.0 inches of gasoline differential pressure across the fuel inlet fitting on 0-320-D2J.

Oil pressure limits: (Normal operation) Minimum 55 p.s.i. - Maximum 95 p.s.i.
(Idling) 25 p.s.i.
(Starting and warm-up) Maximum 115 p.s.i.

NOTE 3. The following accessory drive provisions are available:

NOTE 4. Spark plugs approved for use on these engines are listed in the latest revision of Lycoming Service Instruction No. 1042.

NOTE 5. The above models incorporate additional characteristics as follows:

O-320 Models	Characteristics
O-320	Basic model - four cylinder, horizontally opposed air cooled, direct drive with automotive type generator and starter, provides for single acting controllable pitch propeller.
O-320-A1A	Same as O-320, model designation change only.
O-320-B1A	Same as O-320-A1A except for compression ratio, fuel grade and rating.
O-320-A1B, -B1B	Same as O-320-A1A and -B1A respectively except have straight bore carburetor riser.
O-320-A2A, -A2B, and -B2A, -B2B	Same as O-320-A1A, -A1B, -B1A and B1B respectively except have no provisions for controllable pitch propellers.
O-320-A2D	Same as O-320-E3D except crankcase machined for conical instead of Dynafocal mounts.
O-320-A3A, -A3B, -B3A, and -B3B	Same as O-320-A1A, -A1B, -B1A, and -B1B respectively except have provisions for 7/16" propeller attaching bolts.
O-320-A2C, -A3C	Same as O-320-A2B and -A3B respectively, except for magnetos.
O-320-B2C, -B3C	Same as O-320-B2B and -B3B respectively, except for magnetos.
O-320-B2D	Same as O-320-D1D except conical engine mounts and no prop governor
O-320-B2E	Similar to –B2B except carburetor located same as O-320-D models
O-320-C2A, -C2B, -C3A, -C3B	Same as O-320-B2A, -B2B, -B3A and B3B respectively, except have O-320-A series, low compression pistons, reduced ratings and lower grade fuel requirements.
O-320-C1A, -C1B, -C2C, -C3C	Same as O-320-B1A, -B1B, -B2C, -B3C respectively, except have been converted to low compression pistons.
O-320-D1A	Same as O-320-B3B except has provisions for dynafocal mounts.
O-320-D1B, -D2B	Same as O-320-D1A and -D2A receptively, except for magnetos.
O-320-D1C	Identical to O-320-D2C except has provision for controllable pitch propellers.
O-320-D1D	Similar to O-320-D1A except incorporates Slick instead of Bendix magnetos and has a horizontal carburetor and induction housing
O-320-D1F	Identical to O-320-E1F except is equipped with high compression pistons and has higher H.P. rating.
O-320-D2A	Same as O-320-D1A except has no provisions for controllable pitch propellers
O-320-D2C	Similar to model O-320-D2A except for magnetos.
O-320-D2F	Similar to O-320-D1F but does not have provisions for controllable pitch propeller.
O-320-D2G	Identical to O-320-D2A except incorporates Slick instead of Bendix magnetos and 7/16 instead of 3/8 prop. flange bolts.

O-320 Models	Characteristics
O-320-D2H	Same as D2G except has O-320-B sump and intake pipes and provision for AC type fuel pump.
O-320-D2J	Similar to O-320-D2G except is equipped with two Slick impulse coupling magnetos and the prop. governor pad, fuel pump and governor pads on accessory housing are not machined.
O-320-D3G	Same as D2G except has 3/8 in prop. attaching bolts.
O-320-E1A, -E2A	Same as O-320-D1A and -D2A respectively, except have lower compression ratio and performance.
O-320-E1B, -E2B	Same as O-320-E1A and -E2A respectively except for magnetos.
O-320-E1C, -E2C	Same as O-320-E1A and -E2A respectively except have 1200 series magnetos.
O-320-E1F	Similar to O-320-E1C except has propeller governor drive located on left front of crankcase instead of on the accessory housing.
O-320-E1J	Same as O-320-E1F except is equipped with Slick magnetos.
O-320-E2D	Similar to O-320-E2A except has no provisions for controllable pitch propeller.
O-320-E2F	Identical to O-320-E1F including provisions for propeller governing but does not contain propeller governor drive gears.
O-320-E2G	Similar to O-320-E2D except is equipped with O-320-A series sump and intake pipes.
O-320-E2H	Identical to O-320-E2D except incorporates Bendix instead of Slick magnetos.
O-320-E3D	Identical to O-320-E2D except has provisions for .375 in. propeller flange bolts instead of .4375 in. flange bolts.
O-320-E3H	Identical to O-320-E2H except has .375 in. propeller flange bushings instead of .4375 in. flange bushings.
O-320-H1AD	Integral accessory section crankcase, front mounted fuel pump external mounted oil pump and D4RN-2O21 impulse coupling dual magneto.
O-320-H2AD	Same as -H1AD but with fixed pitch propeller.
O-320-H3AD	Same as -H2AD but with 3/8 in. instead of 7/16 in. propeller flange bolts.
O-320-H1BD	Same as -H1AD but with D4RN-2200 retard breaker dual magneto.
O-320-H2BD	Same as -H2AD but with D4RN-2200 retard breaker dual magneto.
O-320-H3BD	Same as -H3AD but with D4RN-2200 retard breaker magneto.

NOTE 6. These engines incorporate provisions for absorbing propeller thrust in both tractor and pusher type installations.

NOTE 7. These engines are approved for horizontal helicopter application and operation.

NOTE 8. The O-320-E2A and -E2C have alternate rating of 140 hp. @ 2450 r.p.m., the O-320-D series have alternate ratings of 150 hp at 2500 r.p.m. and 155 hp. at 2600 r.p.m.; the O-320-H series have an alternate rating of 150 h.p. at 2600 r.p.m.

NOTE 9. O-320- Weight (dry) and ignition, dual.
